

# ANUSHKA DUBEY

## SUMMARY

- Frontend Developer with 2+ years of experience in building scalable, responsive web applications and admin systems.
- Skilled in React.js, Next.js, Bootstrap, and low-code platforms like Neutrinos Studio.
- Strong understanding of REST APIs, component-based architecture, and UI optimization techniques like lazy loading and React.memo.
- Experience in agile environments, with task tracking via Jira, and collaboration through Outlook and Microsoft Teams.
- Delivered real-world projects in e-commerce, job portals, insurance, and parking systems, with full ownership from development to deployment.

## EXPERIENCE

### Software Developer Bhalekar.ai | Pune, India | May 2025 - Current

AUExports – Multi-Vendor E-commerce Platform (Next.js)

Next.js-based B2B e-commerce site for exporters with vendor dashboards and checkout flows.

Modules: Vendor Dashboard, Product Upload, Auth, Orders, Checkout

Core Duties:

- Rebuilt frontend with modular Next.js + API architecture
- Used SSR, lazy loading, form validation for UX & performance
- Agile delivery via Jira sprints, Outlook reporting, Teams sync

Nimbus Marine – Job Portal & Admin Panel (Bootstrap 5)

Responsive job & recruiter portal for the maritime sector.

Modules: Job Listings, Application Tracker, Admin Dashboard, Onboarding

Core Duties:

- Designed UI in Bootstrap 5 with filters, toggle controls, admin tools
- Built accessible, mobile-first layout with modular CSS
- Collaborated in daily scrums, updated via Jira + Outlook

Bhalekar Official Website (Bootstrap 5)

Static company site for services and branding.

Modules: Landing, Services, About, Contact

Core Duties:

- Built with Bootstrap, HTML, JS; SEO-friendly and responsive
- Reusable components and smooth navigation flow

### Software Engineer Expleo Group | Pune, India | August 2023 - May 2025

*Promoted from Intern to Associate Software Engineer to Software Engineer based on performance*

ExpleoInsurance – Enterprise Insurance Platform (React.js + Express + MongoDB)

A full-stack insurance product for managing policies, claims, and customer data.

Modules: Policy Dashboard, User Auth, API Integration, DevOps Pipelines

Core Duties:

- Developed scalable frontend using React.js with Redux Toolkit for state management
- Built REST APIs in Express.js, connected with MongoDB for real-time data updates
- Implemented Jenkins CI/CD pipelines for automated deployment and testing
- Focused on performance, code quality, and secure RESTful communication
- Reported progress via Jira, daily scrum standups, and weekly Outlook summaries

Neutrinos Claims & Loan Management – Low-Code Workflow Platform

A digital claims and loan processing system built using Neutrinos Studio for internal insurance operations.

Modules: Claims Form Workflow, Loan Approval, Document Upload

Core Duties:

- Created dynamic forms and workflow logic using Neutrinos low-code editor
- Integrated backend APIs into form components with data validation rules
- Designed automated flow for claim submission and document verification
- Handled Jira tickets, QA cycles, and reported task status via Outlook

### Intern – WebnSoft | Indore, India | Jan 2023 – May 2023

Speed Parking (PHP + MySQL)

Parking system for societies to manage daily parking activity.

Modules: Login, Visitor Logs, Booking Panel

Highlights:

- Full-stack dev in PHP, JS, MySQL, Bootstrap
- Built secure login, CRUD, and mobile-ready admin UI
